I'm a 6th-semester Informatics student at Telkom University with a deep interest in Artificial Intelligence. Through internships and academic projects, I've gained experience in developing AI-powered applications, processing data, and building interactive features for virtual-world environments. Beyond the technical side, I enjoy collaborating with others and bring critical thinking, adaptability, and problem-solving skills to every team.

Work Experiences

Medusa Technology - Jakarta, Indonesia

Jun 2026 - Aug 2026

Programming Intern

An education technology company focused on immersive virtual-world learning and interactive digital training experiences.

- Developed an intelligent NPC chatbot using Llama 3, LangChain, ChromaDB, RAG, and player-specific memory to provide more contextual and personalized interactions.
- Built and deployed REST APIs via FastAPI on AWS EC2, optimizing Linux server environments and managing MariaDB databases to seamlessly bridge metaverse activities with external systems
- Programmed complex in-world mechanics using Linden Scripting Language (LSL) to create interactive features, including a real-time racing game with anti-cheat mechanisms and dynamic 3D leaderboards

PT. Indonesia Indicator - Tangerang Selatan, Indonesia

Feb 2023 - Aug 2023

IT & Data Intern

Big Data and AI research institute focusing on analyzing political, economic, and social phenomena in Indonesia.

- Performed data crawling and extraction using Regex and automation tools
- Supported data entry, analysis, deployment, and monitoring processes
- Collaborated in the development of internal tools to enhance employee productivity

PT. Gucob E-Service (Lensza.co.id) - Jakarta, Indonesia

Feb 2021 - Jan 2023

Digital Marketing Intern

A leading e-commerce platform specializing in colored and clear contact lenses.

- Created and edited promotional content using Canva for social media platforms
- Designed newsletters and monitored engagement performance via Shopify
- Scheduled content uploads and managed customer interaction to maintain brand consistency and service quality

Education

Universitas Telkom - Bandung, Indonesia

Sep 2023

Bachelor of Informatics, 3.66/4.00

Organization

Artificial Intelligence Laboratory - Telkom University, Bandung

Oct 2023 - Feb 2024

Study Group Member

Artificial Intelligence Research group under the Intelligent Systems Research division.

- Applied Python for data processing tasks using NumPy, Pandas, and Scikit-learn
- Participated in practical sessions on Natural Language Processing and image processing
- Contributed to the development of a project utilizing Natural Language Processing techniques

Skills & Projects

- **Hard Skills:** Python, C++, Java, PHP, CSS, HTML5, JavaScript, Typescript, Angular, Java Spring Boot, Laravel, Flutter, MySQL, PostgreSQL, Linux Server Management, LangChain, ChromaDB, Linden Scripting Language (LSL)
- **Soft Skills:** Critical Thinking, Problem Solving, Adaptability, Teamwork, Communication, Time Management, Fast Learning.
- **Projects - GPT-NER Implementation (2026):** Developed a Streamlit-based NER app using Llama 3, Groq API, and Regex.
- **Projects - NexEvent (2026):** Built a Flutter and Laravel campus event platform with tickets and automated waitlists.
- **Projects - Posyandu Pintar (2026):** Built an AI-assisted toddler health monitoring app using Next.js and TypeScript.
- **Projects - MicroPlast (2026):** Developed a Python and OpenCV web app to detect and classify microplastic particles.
- **Projects - MyDormitory (2025):** Developed a Laravel and Flutter dormitory attendance system with QR-based check-ins.
- **Projects - TelyuTalks (2025):** Built a Java-based PWA academic Q&A platform for students and lecturers.
- **Projects - House Pricing Prediction (2023):** Created a Python-based house price prediction model using CatBoost and Streamlit.
